SECTION A-A

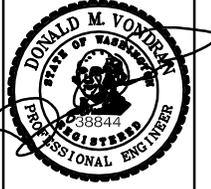

DETAIL HOOK CLAMP

DETAIL NOTES

The dimensions shown are for an installation on a 54" diameter catch basin. For different diameter catch basins, adjust dimensions to maintain a 45° angle on the "vertical" bars and 7" o.c. maximum spacing of bars around lower steel band.

Metal parts shall be corrosion resistant or galvanized steel. No aluminum.

This debris barrier is also recommended for use on the inlet to roadway cross-culverts with the high potential for debris collection (except on streams).
